

About me

I am a passionate Mid Front-End Software Developer with a strong background in Angular Universe. With 5 years of experience, I have worked on diverse projects, leveraging my expertise in various technologies and frameworks to deliver impactful solutions. With a strong commitment to delivering high-quality code, I continuously stay updated with the latest trends and advancements in my field. I thrive in collaborative environments and enjoy tackling challenging problems, finding innovative solutions, and delivering exceptional results. Leaning towards in to mobile development - Ionic, NativeScript, Swift.

I am Marvel, Star Wars, PlayStation type guy :)

Projects & technologies

FenCorp technologies:

- Python3
- Flask
- Angular 7
- Bootstrap 4
- SlickGrid
- Github

Responsibilities:

- create informative/editable/interactive tables
- write API calls to retrieve & present data
- perform CRUD operations
- create reusable forms like Reactive Forms

505HQ technologies:

- Python3
- Django

Responsibilities:

- develop responsive & interactive UI/UX
- write API calls to retrieve & present data

Drivity technologies:

- Angular 7 - 9
- Bootstrap 4
- Angular Material
- Bitbucket

Responsibilities:

- develop features on demand
- maintain 4 language translation files (i18n)
- create & update UX/UI
- perform CRUD operations
- create reusable forms like Reactive Forms
- update Angular version
- refactor old or legacy code

Nortal technologies:

- React 16
- Mapbox
- GitLab
- Azure cloud
- Angular 11 - 13
- NgRX
- Angular Material
- Bootstrap 4 - 5

Responsibilities:

- maintain & update responsive UI/UX
- discuss & plan tasks for future
- discuss & implement designs
- create new features & update existing ones
- reactive forms & validators
- update & add translations
- maintainer projects architecture
- refactor old or legacy code

Viggo HQ technologies:

- NativeScript
- Angular 16
- Angular Material
- NgRX/rxjs
- Github

Responsibilities:

- apply new responsive designs
- implement new features
- update current features flow
- apply/update translations
- refactor old or legacy code
- update existing functionalities
- QA & test all your work
- maintain all features on both mobile platforms
